Outline of Forum

Da Nang University of Technology is one of 3 Universities for Science and Technology in Vietnam, and the largest university in central Vietnam. The university contracted agreements of cooperation with more than 30 universities in 10 countries; Kyoto University, Osaka University and Waseda University from Japan. The university is implementing many international cooperation projects, and is a representative and important center for research and education in central Vietnam.

As an activity of this project, Okayama University contracted the agreement of cooperation with Danang University of Technology, and intended to promote the cooperative relationships in research and education through the exchange of staff and students, collaborative researches and information exchange in environmental fields. This agreement also intended to contribute the solution of environmental problems in Vietnam by the capacity development through the application of Japanese science and technology. In the

forum, both universities introduced the current research activities, and exchanged the opinions to establish the cooperative relationship such as cooperative researches and acceptance of student internship.
