October 2021/ April 2022**

Graduate School of Environmental and Life Science

(Doctor's Course)

OKAYAMA UNIVERSITY

Diploma Policy

The Graduate school of Environmental and Life Science aims to achieve a safe, secure and prosperous society while accomplishing the sustainability of all life. To accomplish this goal, we are conducting professional and interdisciplinary education and research in the fields of environmental science, biotechnology, medical science, and social science. We use these activities to foster highly-educated professional researchers and engineers and facilitate their contribution to our society. The following standards must be met in order to receive a degree:

(Master's degree)

The Master's degree is granted to those who have been enrolled for the required number of semesters, received specific training, acquired the necessary credits, and passed the graduate school's final examination. Specifically, the applicant must completed the following tasks:

- (1) Have the skills and knowledge to perform research and engineering directed toward problem setting or solving in society while demonstrating highly-educated expertise.
- (2) Created a clear and logical master's thesis that is based on reliable results and sincere consideration.

(Doctoral degree)

A doctoral degree (Ph.D.) is granted to those who have been enrolled for the required number of semesters, received specific training, acquired the necessary credits, and passed the graduate school's final examination. Specifically, the applicant must have completed the following tasks:

- (1) Have sufficient skills and knowledge to engage in independent research and engineering activities in society while demonstrating highly-educated expertise.
- (2) Created a clear and logical dissertation that is based on reliable results and sincere consideration.
- (3) Research results which are novel and valuable.

Admission Policy

This graduate school develops human resources who can solve the problems of creating a recycling-based society and ensuring food security through education. The Graduate School seeks the following human resources from Japan and overseas.

- (1) Those who have the rich culture, ethics, and expertise necessary for the sustainable development of civilization, and who have the language skills to be active internationally.
- (2) Those who have a strong desire to acquire advanced expertise based on scientific knowledge for sustainable development of the global environment and elucidation of life phenomena.

Prior to admission, those who wish to enroll in this graduate school must have basic knowledge and abilities in their specialized fields in the bachelor's program, and have the ability to apply their knowledge and acquire international communication skills. Therefore, we will carry out various entrance examinations such as an examination to confirm the ability to communicate in English and the specialized knowledge of each major, and an oral examination to confirm whether or not the person is suitable for the ideal type of human resources being sought. Details of the entrance examinations and evaluation methods will be specified in the application guidelines.

Purpose of Human Resources Development in Each Division

[Environmental Science]

Adopting “the construction of sustainable society” as the common academic philosophy, this division is trying to solve issues related to the following: creation and management of urban and regional space in harmony with the environment; biodiversity and ecosystem conservation; food problems; epidemiologic and mathematical scientific aspects of medical care; the construction of recycling-based society and low carbon society; and the creation of materials with low environmental load and process. Through this education and research conducted in widely diverse fields associated with environmental science, we train researchers and high-quality professionals who have the ability to achieve the construction of sustainable society independently and the rich expertise to support it, and who can play an active role internationally by exercising leadership.

[Agricultural and Life Science]

This division carries out widely diverse education and research activities, from basic fields that clarify life phenomena using methods such as ecology, physiology, cell biology, gene science, biochemistry, organic chemistry, analytical chemistry, to the fields of application, including the development of production technology and environmental conservation technology using animals, plants, and microorganisms, the development of functional food materials and drugs, and the maintenance of the diversity of organisms. Through these educational and research activities, we train personnel who can achieve independent resolution of issues confronting society, who have rich expert knowledge to support society, and who possess a high level of research ability and rich creativity capable of playing active roles internationally by exercising leadership.

8 Admission Procedures

(1) Method of Admission Procedures

Successful applicants will be accepted into the program after having completed the admission procedures. Details will be separately informed to successful applicants later.

(2) Period of Admission Procedures

The period of admission procedures has been scheduled as follows. However, successful applicants will be informed about details later.

October 2021 Entrants: September 17, 2021 to September 21, 2021

April 2022 Entrants: March 14, 2022 to March 15, 2022

9 Other

(1) Admission Fee and Tuition Fee

Admission fee: 282,000 yen (expected amount)

Tuition fee: 267,900 yen (for half a year); 535,800 yen (for a year) (expected amount)

※ When the amount was revised at the time of admission or while at school, the new amount will be applied from the time of the revision.

In addition, a premium for Personal Accident Insurance for Students Pursuing Education and Research, etc. will be needed as an additional expense.

(2) Study Assistance

We have many systems for study assistance: admission fee exemptions, admission fee collection postponement, tuition fee exemptions, and scholarships.

(3) Day/Evening Course System

Graduate School of Environmental and Life Science applies the special provision for educational methods (Day/Evening Course System) stipulated in Article 14 of Standards for Establishment of Graduate Schools to make it easier for students who work during class hours to take courses. We provide classes and research guidance not only during the day, but also during evenings (and Saturdays, summer and winter vacations, etc.).

(4) A supporting system to extend your study period for doctoral course

This supporting system is designed that students, who are unable to complete their course within the standard doctoral study period for 3 years due to circumstances such as work schedule, can extend the study period to a maximum of 6 years. The student can apply extension for 4 years, 5 years, or 6 years and plan to complete the course within the permitted period.

With this system, you can study in our doctoral course in this graduate school during extended your study period permitted with tuition fee for 3 years. This tuition fee will be divided into permitted period and you will pay accordingly.

In addition, after applying this supporting system, early completion will not be permitted.

Details will be announced at the entrance procedure.

(5) Distance Learning Scholarship for Working Students of Graduate School Doctor's Course

This scholarship is for working students who do not receive any financial support from their companies, etc. for their study, and those who have a distance of 50 km or more to Okayama University from either their place of work or home, where the distance to Okayama University is shorter (hereinafter referred to as "the

commuting place"), and also those who will enroll (or advance to) the University in April with excellent grades.

The amount of the scholarship is 120,000 Japanese yen to 240,000 yen per year, depending on the distance from the commuting place to the University. The period of payment is within the standard period of study (3 years). Payment will be suspended during the period of leave of absence from the University. Candidates for the scholarship will be notified at the time of the announcement of the results of the entrance examination. However, even in the case of recruitment, if the number of eligible applicants of this scholarship is reached in the first application period, the application for this scholarship will not be accepted in the second application period. In any case, we are not accepting applications for this scholarship for the third application period.
