

## 2-4 UCHI-ECO diagnosis

Mariko Suzuki

### 1. Outline

Date: October 12, 2012, 9:30–15:30

Venue: Room 15, Waste Management Research Center, Okayama University

Participants: 14

- 3 analysts  
Mr. Yasuhito Yamaguchi  
Mr. Masaki Kumashiro  
Mr. Masayuki Komeyama
- 11 examinees (students, office staff, etc.)

### 2. UCHI-ECO diagnostic procedure

UCHI-ECO diagnosis presented the annual household energy usage and utility costs, and then proposed, based on household survey information, how to conserve energy by using dedicated software.

The procedure was as follows:

- 1) Examinees answered questionnaires about utility bills and lifestyle in advance.
- 2) Analysts advised examinees on energy-saving measures.
- 3) Examinees reported the status of implementation 3 months later.
